Commission Activation & Basic Operation Rules

Fair conditions and core safeguards to activate commission payouts and protect reward integrity.

REAL-TIME DISTRIBUTION

Real-time settlement! Hourly payout & instant commission

To defend protocol economics and avoid active bloat, instant commission and yield distribution are recorded on-chain once per hour (the next token payout cycle), and the inflation ceiling is regulated accordingly.

NEW CORE INNOVATION

Hourly real-time payout

Acquisition Activation

To activate yield payout and commission distribution, each member must stake a minimum of **1 PAX (\$10 USDT equivalent)** on-chain.

Commission 5× Cap (Limit Cap)

When accumulated stake exceeds **5× your threshold (1 PAX = 5 PAX equivalent)**, staking is auto-paused and additional yield cannot be claimed until a new stake is acquired.

Team Expansion & Super-rank Acquisition

Even in the same tier group, infinite commission is unlocked by activating the deeper-line team expansion exploit. Special vertical ranks earn **×3 multiplier yields** in additional commission.

Full Team Staking Requirements & Reward Conditions
